

Minerals and their gems

Quartz- SiO_2

Rose quartz

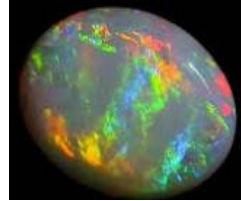

Citrine

Amethyst

Opal – hydrated (contains water) amorphous form of silica, the water in the structure causes light to be refracted in a multitude of colors.

Agate

Beryl - (Emerald, Aquamarine, Heliodor, Morganite) $\text{Be}_3\text{Al}_2(\text{SiO}_3)_6$

Emerald on matrix

Aquamarine

Golden Beryl-Heliodor

Morganite

Corundum - (Ruby, Sapphire) Al_2O_3

Ruby

Sapphire

Garnet - Almandine

Olivine – Peridot $(\text{Mg}, \text{Fe})_2\text{SiO}_4$

Topaz - $\text{Al}_2\text{SiO}_4(\text{F}, \text{OH})_2$
