

TEST #2 – Questions Page 1 of 2

1-9	Station 1	Identify each fossil (A through I)
10	Station 1	Which of these fossils is found in the limestones of the Egyptian pyramids?
11	Station 1	Which of these was a planktonic species in the Paleozoic oceans?
12	Station 1	Which coral lived most recently in geologic history?
13	Station 1	What is the common nickname for Fossil H?
14	Station 1	Which of these fossils had zooeciums?
15	Station 1	Which shell might have been stepped on by a Hadrosaur
16-24	Station 2	Identify each fossil (A through I)
25	Station 2	Which invertebrate had a pedicle valve?
26	Station 2	What was his pedicle valve used for?
27	Station 2	Which plant helped geologists with plate tectonics and Gondwanaland?
28	Station 2	What are the markings on Fossil B called?
29	Station 2	Which Mollusc species is alive today?
30	Station 2	Which species is most closely related to Belemnites?
31	Station 2	Which of these species had/have operculum?
32-40	Station 3	Identify each fossil (A through I)
41	Station 3	This amphibian died out during the Permian extinction.
42	Station 3	He was a herbivore from the Order Saurischia.
43	Station 3	He is the state fossil of New York.
44	Station 3	Unlike most others of his phylum, he is inarticulate.
45	Station 3	Which fossil is most related to modern starfish?
46	Station 3	This creature filtered his food with a lophophore.
47	Station 3	What important distinction did Fossil B. have within his Class
48-56	Station 4	Identify each fossil (A through I)
57	Station 4	Which of this is an invertebrate carnivore?
58	Station 4	What is the nickname of Fossil F?
59	Station 4	Which creature ruled the Devonian oceans?
60	Station 4	Which creature had 8 toes?
61	Station 4	Which of these was the last to go extinct?
62	Station 4	Which one of these is still alive today?
63	Station 4	Where did animal H get its name?
64	Station 4	Name two unique characteristics of G.

TEST #2 – Questions Page 2 of 2

65-73	Station 5	Identify each animal by its teeth (A through I)
74	Station 5	Which two species are clearly grazers from the form of their teeth?
75	Station 5	Why are teeth important in identifying sharks?
76	Station 5	Who was the dominant marine predator in the Late Cretaceous Period?
77	Station 5	One of these is actually an early marine whale. Which one?
78	Station 5	When did species C go extinct?
79-87	Station 6	Identify each species (A through I)
88	Station 6	Which species is a Hadrosaur?
89	Station 6	Which invertebrate is an articulate brachiopod?
90	Station 6	Which two fossils had cellulose?
91	Station 6	Which might have been food for the animal in Figure C.
92	Station 6	I survived the Permian extinction and lived throughout Gondwana.
93	Station 6	What did animal A use his "sail" for?
94	Station 6	Which animal was a browser in the Eocene and was related to horses?
95-102	Station 7	Identify each species (A through H)
103	Station 7	Might be the link from marine life to live on land.
104	Station 7	The state fossil of Michigan.
105	Station 7	Which is a Triassic carnivore?
